```c
#include<stdlib.h>
#include <windows.h>
#include "liveTesting.h"
static int score = 0;
static int record1(int n){
        //n will decide question number
        //dictact question
        //wait for 3 sec , open commandpropmt
        char * convert= "Recording_Module.exe 3 input_file.wav testing.txt";
        system(convert);  //Converting the file into png format
        int digit;                      //
        digit = online_testingQ(n);

        return digit;
}
```
